

AUGUST - SEPTEMBER 2026 EDITION

FREE TO TAKE HOME!

● PRACTICE DOCTORS

Dr Peter Louie

MBBS(WA), BSc, FRACGP
Family Medicine, Acupuncture, Diving
Medicals & Skin Checks

Dr Wang-Jet Yee

MBBS(WA), FRACGP
Family Medicine, Minor Surgery &
Proactive Skin Checks

Dr Sean Thomas

MBBCh, BAO, LRCPI, LRCSI, NUI
Family Medicine, Interest in
Cardiology
& Rheumatology

Dr Jonathan Lim

MBBS, DCH, FRACGP, MSPMED
Family Medicine & Sports Medicine

Dr Eashani Valemurugan

MBBS(Sri Lanka), MD(Sri Lanka), FRACGP

Dr Yure Pavic

BMedSci, MBBS, Grad Dip OHS, FRACGP,
CIME, FAFOEM
General & Occupational Medicine

Dr Dilshad Dhaliwal

MBBS, DCH, FRACGP
Other languages spoken for Dr
Dhaliwal: Bahasa Malaysia, Hindi,
Punjabi

Dr Annette Camer-Pesci

MBBS, FRACGP, Bachsc
Family Medicine, Preventive
Medicine, Spots Medicine & Chronic
Health Disease

Dr Rob Seeley

(GP Registrar) MBBS
Family Medicine & General Medicine

Dr Sanam Nikdehghan

(GP Registrar) MBBS

Dr Lotte Schulz

(GP Registrar) MBBS

Dr Ryan Kang

(GP Registrar) MBBS

Dr Ellen Hayes

(GR Registrar) MBBS

● PRACTICE STAFF

Practice Manager:

Rachael Bradley

Nurses:

Julie, Pat, Kerry, Victoria,
Molly, Carly & Myrel

Reception Staff:

Joanne, Ioli, Ada, Rosa,
Cristina, Karen, Louisa, Tayla,
Rebekah, Anna, Channele &
Mari

● SURGERY HOURS

Monday to Thursday 7am – 7pm | Friday 7am - 6pm | Saturday 7am – 1pm

● BILLING

• Private Practice

• Standard Appointments \$95 with a rebate of \$45.05

• Long Consultations \$155 with a rebate of \$87.10

• Weekend Consultations \$100 with a rebate of \$45.05

(there is no bulk billing on this day including children 12 and under)

• We Bulk Bill all concessions Card Holders and Under 16 year old's Monday-Friday
before 5pm ONLY.

• Please kindly note there is no Bulk Billing after 5pm weekends or weekends for
Concession Card Holders and Under 16 year old's.

● AFTER HOURS & EMERGENCY

The Practice provides 24 hour care for patients together with an Accredited Locum
Service, who will provide you with home visits.

● ONLINE APPOINTMENT BOOKINGS

Please add or Download the App today

South Street Medical Centre offers online appointment bookings from our website, via the
HotDoc application.

Visit www.southstreetmedicalcentre.com.au and click on the "book online" button.

● PROACTIVE SKIN CHECKS AVAILABLE AT SSMC

Performed by Dr Peter Louie & Dr Wang-Jet Yee

● OCCMEDIC CORPORATE & INDUSTRIAL HEALTH AT SSMC

Performing Workers Compensations, Motor Vehicle Claims and Pre Employment
Medicals. Same day appointments available – Performed by Dr Yure Pavic –
Occupational Physician

● OTHER SERVICES AVAILABLE AT SSMC INCLUDE

• Physiotherapy

• Chiropractor

• Vision Care

• Pathology

• Active Podiatry

Email Communication. Email is not a secure form of communication and we do not
use this to communicate personal information to patients without their consent.

Whilst we make every effort to keep your information secure it is important for
patients to be aware of the risks associated with electronic communication, in that
the information could potentially be comprised and accessed by someone other than
the intended recipient. Patients must be aware that any communication they direct
to the surgery via email is also NOT secure and confidentially cannot be guaranteed.
Patients communicating through email do so at their own risk.

If you do choose to contact the surgery via email this will be considered as patient
consent to reply via email.

We endeavour to reply to all emails within 2 working business days.

Our emails are checked on a regular basis, however they are not constantly
monitored. If you have an issue that requires urgent attention, we request that you
contact the practice via telephone on 9337 7888.

Retirement Announcement. After many years of dedicated service, Dr Marcela De
Glavez will be retiring at the end of September 2026. We would like to express our
sincere gratitude to Dr Marcela De Glavez for the exceptional care and commitment
shown to our patients and the practice over the years. We wish you a long, happy,
and well-deserved retirement filled with good health and happiness.

Thank you, Dr De Glavez, for everything you have done. You will be greatly missed by
both our team and your patients.

Chronic conditions

Chronic and long-term conditions affect millions of Australians and drive much of our health system use. The most common remain mental and behavioural conditions (notably anxiety and depression), back problems, arthritis, asthma, diabetes, and cardiovascular disease. These conditions often cluster: someone with back pain may also experience depression or obesity, compounding symptoms and making day to day life harder. Prevalence rises with age, but many start earlier than people expect, especially musculoskeletal pain and mental health conditions.

What you can do today:

- Know your numbers. Track blood pressure, cholesterol, blood glucose (if at risk), and weight/waist. Early changes are easier to reverse.
- Move most days. Aim for 150 minutes of moderate activity weekly plus two strength sessions; even 10 minute bouts reduce pain, improve mood, and support heart health.
- Prioritise sleep and stress care. Regular sleep times and simple stress routines (breathing, brief walks, social connection) help both pain and mood.
- Eat for stability. Emphasise vegetables, whole grains, legumes, nuts, olive oil, and fish; limit ultra processed foods and sugary drinks to reduce inflammation and support weight and glucose control.
- Plan care, not just visits. Ask your GP about a chronic disease management plan and allied health referrals under Medicare, including physiotherapy, dietetics, and mental health support.
- Stay up to date with vaccines. Annual flu shots and recommended COVID boosters lower complications, especially for people with heart, lung, diabetes, or kidney disease.
- Make it social. Join local walking groups or condition specific programs—accountability boosts adherence.

Small, consistent steps matter more than perfection. If pain, breathlessness, low mood, or daily function worsens, book a review with your GP to adjust your plan promptly.

How your mouth shapes your mood

A healthy mouth does more than prevent cavities—it meaningfully supports wellbeing. Oral pain, bleeding gums, and missing or sensitive teeth can limit what you eat, how you sleep, and whether you smile or socialise. Those daily frictions add up: people with untreated dental problems report more stress, lower life satisfaction, and higher rates of anxiety and depression. Conversely, comfortable, functional teeth enable varied, enjoyable eating, clearer speech, better sleep, and confidence in social and work settings—core ingredients of happiness.

Biology plays a role too. Chronic gum disease is an inflammatory condition; persistent inflammation is linked with fatigue, low mood, and conditions like diabetes and cardiovascular disease. Treating periodontal disease can reduce systemic inflammation markers, often improving energy and overall quality of life.

Practical steps to boost both oral and emotional health:

- Brush with fluoride toothpaste twice daily and floss every day..
- Limit frequent sugary snacks and acidic drinks.
- Book regular check ups and cleanings

Whilst the primary specialist for dental health is your Dentist, if you start to have concerns over your teeth or gums, your GP is always a good place to start especially if there may be a link to more serious health concerns.

Small, consistent habits create a positive feedback loop: a healthier mouth, easier daily life, and more reasons to smile.

The Importance of the RSV Vaccine in Australia

Respiratory Syncytial Virus (RSV) is one of the leading causes of serious respiratory illness in Australia, particularly affecting infants, older adults, and people with chronic medical conditions. While RSV often causes symptoms similar to the common cold, it can lead to severe complications such as bronchiolitis, pneumonia, and hospitalisation in vulnerable groups. With safe and effective vaccines now available, Australia has an important opportunity to reduce the burden of this common virus.

Each year, RSV places significant pressure on Australian hospitals during the autumn and winter months. Thousands of babies require medical care for RSV-related illness, while older adults aged 60 years and over are at increased risk of severe infection, particularly those with heart disease, lung disease, diabetes, or weakened immune systems.

Vaccination is one of the most effective ways to prevent serious RSV disease. In Australia, maternal RSV vaccination during pregnancy helps protect newborn babies during their first six months of life by passing protective antibodies from mother to baby. Vaccines are also available for older adults to reduce

the risk of severe illness, hospitalisation, and complications.

The benefits of RSV vaccination extend beyond the individual. Preventing severe illness helps reduce hospital admissions, eases pressure on the healthcare system, and protects families from the emotional and financial impact of caring for a seriously ill loved one.

If you are pregnant, over 60 years of age, or have underlying health conditions, speak with your GP or healthcare provider about whether the RSV vaccine is recommended for you. Vaccination is a simple step that can help protect both yourself and those most vulnerable during Australia's respiratory virus season.

Mesothelioma

Mesothelioma is a rare, aggressive cancer that forms in the lining of the lungs (pleura) most often, and less commonly in the abdomen (peritoneum) or around the heart.

The primary cause is inhaling asbestos fibres, typically from occupational or environmental exposure decades earlier. Symptoms can be subtle at first—shortness of breath, persistent chest pain, cough, fatigue, or unexplained weight loss—and may be mistaken for common respiratory conditions.

Diagnosis usually involves imaging (chest X ray, CT), fluid analysis if there's a pleural effusion, and a tissue biopsy to confirm cell type (epithelioid, sarcomatoid, or biphasic). Staging assesses how far disease has spread and guides treatment.

Treatment is individualised and often combines:

- Surgery for selected early pleural cases to remove diseased lining and relieve symptoms.
- Systemic therapy: platinum based chemotherapy, immunotherapy (checkpoint inhibitors), or combinations to improve survival and control symptoms.
- Radiation therapy to shrink tumours or reduce pain.
- Supportive care: procedures to drain fluid, pain control, pulmonary rehab, and nutrition support.

If you've had asbestos exposure and develop persistent chest symptoms, see your GP promptly and mention the exposure history.

In Australia, asbestos exposure has a long legacy in construction, shipbuilding, and home renovations. If you're renovating, use licensed professionals for asbestos testing and removal, and follow your state's safety regulations.

Spring readiness

As winter fades, spring brings longer days—and spikes in pollen, asthma flares, and sudden storms. Get ahead now to protect your breathing and wellbeing.

- Track pollen and plan. Check daily pollen counts and thunderstorm asthma alerts for your region. On high risk days, keep windows closed, use recirculated air in cars, and prioritise indoor exercise.
- Tune your asthma and allergy plan. If you wheeze, cough at night, or use a reliever more than twice a week, book a GP review. Start or step up preventer inhalers before peak pollen. Use intranasal corticosteroid sprays daily for hay fever; add non drowsy antihistamines as needed.
- Prep your environment. Replace or clean HVAC filters, service inhalers/spacers, and stock tissues, saline rinses, and eye drops. Shower after outdoor activities to remove pollen; dry laundry indoors on extreme pollen days.
- Build resilience habits. Aim for regular sleep, movement most days, and a Mediterranean style eating pattern to support immune and respiratory health.
- Prepare for severe weather. Thunderstorms and early heat spikes can hit in spring. Assemble a simple kit: updated medications, water, a charged power bank, and copies of action plans. Save emergency numbers and set local alert notifications on your phone.

Early, consistent steps reduce flare ups, days off work or school, and unplanned doctor visits. If you notice worsening breathlessness, chest tightness, or persistent facial pain from sinus symptoms, seek medical advice promptly.

LEMON-HERB CHICKEN WITH ASPARAGUS AND PEA ORZO

Here's a bright, easy spring recipe that can be made as directed, or made veg by swapping out the chicken for Haloumi and using vegetable stock. Serves 4 | 30 minutes

Ingredients (Serves 6–8):

- 2 cups chicken stock
- 1 cup orzo pasta
- 2 tbsp olive oil, divided
- 500 g chicken thigh fillets, cut into bite-size pieces
- 1 bunch asparagus, trimmed, cut in 3–4 cm pieces
- 1 cup frozen peas
- Zest and juice of 1 lemon
- 2 cloves garlic, minced
- 1 tsp Dijon mustard
- 1 tsp honey (optional)
- 1 tbsp chopped fresh parsley
- 1 tbsp chopped fresh mint or dill
- 30 g grated parmesan (plus extra to serve)
- Salt and pepper
- Lemon wedges, to serve

Method:

1. Cook orzo: Bring stock to a boil, add orzo, simmer until al dente (8–9 min). Reserve a splash of stock; drain.
2. Sear chicken: Heat 1 tbsp oil in a large skillet over medium-high. Season chicken with salt/pepper; cook 5–7 min until browned and cooked through. Transfer to a plate.
3. Spring veg: In the same pan add remaining oil, asparagus, and a pinch of salt; cook 2–3 min. Add peas and garlic; cook 1 min.
4. Sauce: Stir in lemon zest/juice, Dijon, honey, and a splash of reserved stock to make a light pan sauce. Scrape up browned bits.
5. Combine: Return chicken to pan with orzo, parmesan, parsley, and mint/dill. Toss until glossy; loosen with more stock if needed. Season to taste.
6. Serve: Finish with extra parmesan, black pepper, and lemon wedges.

● SPECIAL PRACTICE NOTES

Results.

These are best discussed in a follow-up consultation to ensure proper medical care, review of condition and re-examination. Results over the phone are not recommended because of lack of confidentiality, inability to reassess condition and the potential for misunderstanding.

Referrals.

Doctors in this practice are competent at handling common health problems. When necessary, they can refer you for further investigation. You can discuss this openly with your doctor.

Phone Calls.

Due to a lack of confidentiality, the inability to assess the physical condition and the potential for misunderstanding, patients are discouraged from phoning the surgery to speak to the Doctor. It is preferable that an appointment be made with your preferred Doctor. However, queries may be dealt with by leaving a message explaining your request with the reception staff, who will pass this onto the Doctor/Nurse for further action.

Reminder System.

Our practice is committed to preventative care. Your doctor will seek your permission to be included in our reminder system. We may issue you with a reminder notice from time to time offering you preventative health services appropriate to your care. If you do not wish to be part of this system please let your doctor or the receptionist know. We encourage self-responsibility in your health.

Complaints/Suggestions.

These may either be placed in the suggestion box in the reception area, or directed to Health & Disability Services Complaints Office (HADSCO). GPO Box B61, Perth 6838, Tel 9323 0600.

Your medical record is a confidential document.

It is the policy of this practice to maintain security of personal health information at all times and to ensure that this information is only available to authorised members of staff. We abide by the 10 National Privacy Principles available at: www.privacy.gov.au/health/index.html

This practice has a no smoking policy.
